Pursuing BSCS

PROJECTS

Image Gallery App

📅 08/2023 Present
📍 **Live Project**

Image Gallery is an App which I created for my personal use. Because I needed something where I can host my images and use it through CDN's.

- User can login himself using Email
- User can upload pictures.
- User can see only those Images which were uploaded by him
- Theme Preference

Get Movie Info

📅 11/2023 Present
📍 **Live Project**

Get Movie Info App is use to get the information about movies like Rating, Storyline and many thing . I have used famous TMDB api for this app.

- User can create account through google.
- User Can Add and Remove the movies from Watchlist. Your watchlist will be save on Database.

WeChat-io

📅 04/2023 Present
📍 **Live Project**

WeChat-io is a Chat App where user can chat with other although it supports only text messages not any media file.

- User can login through email verification
- User can login through Google
- User can create chat room in order to talk with someone he want to
- Only that person can enter the room who knows the name of Room
- Messages are limited to particular room
- User can logout whenerver he wants
